ReactJS – 3 Years | NEXT.js – 2 Years

Setup of choice. Has developed and helped architect two e-commerce platforms that collectively reach millions of customers world-wide. Utilizing a custom-coded feature-complete internal component library that adheres to the ARIA-specification, AAA-contrast compliant, with inertia-based swipe-gesture support and a modular NEXT.js page setup. Prefers a hook / functional component approach for an agnostic code structure, utilizing Context, with prior experience in Redux.

26.8mm

VueJS 3 – 1 Year | Vuex – < 1 Year

Moderate experience in modern Vue with Composition API and Vuex for global state management. Built a draft proof-of-concept MVP web application which allows users to simulate how different wall art may look at home, with an integrated web store and interactive drag-and-drop functionality for the products.

31.1mm

HTML 5 – 6 Years

Comprehensive understanding of the HTML5 specification with a strong passion for an accessible web through technologies such as the Accessibility DOM, utilizing semantic elements and ARIA-attributes where appropriate to optimize a site for screen-readers, SEO, parsing performance and modern components which may require manual focus handling and contextual / functional descriptors.

31.1mm

CSS 3 – 6 Years | TailwindCSS – 2 Years | SCSS – 1 Year

Proven mastery over the visual. Utilizes compile-time frameworks such as Tailwind and SCSS to speed up development and management of complex components. Understands stacking context, optimal transition / transform properties for maximum performance and keeps up-to-date with new additions and compatibility charts. Is able to confidently create consistent designs across entire sites.

216.4mm

JavaScript – 6 Years | TypeScript – 2 Years

Many years of experience in JavaScript, from ES5 to ES2022 syntax. Is able to architect web applications from scratch that are scalable, easy to maintain and of an incredibly high-quality standard, optimizing for performance with DX and UX in mind. Prefers TypeScript for code-safety.

26.8mm

NodeJS – < 1 Year

Have worked with small Express based applications. Building out some basic routing and authentication for educational purposes as well as email-forms on site. Willing to grow much more within back-end technologies in the future.

26.8mm

Swift – < 1 Year

As a hobby, am currently learning to better my knowledge in Swift with SwiftUI, as many companies today commonly want to expand their businesses to iOS. Being able to understand native platform code will prove to be invaluable to many actors around the world.

**Adobe® Photoshop – 6 Years | Illustrator – 3 Years | InDesign – 2 Years**

Experience working with Adobe Creative Cloud since CS5. Created many forms of visual assets for use on the Web, print and motion picture. Logotypes, posters, business cards, retouching photography, iconography for the web, album covers are all common tasks that are created with these tools with a sense of confidence, both for clients and for myself.

**Affinity Photo – 3 Years | Designer – 3 Years | Publisher – < 1 Year**

Personal primary driving software for photo-editing, illustration and publishing and prefers this suite over the Adobe® Creative Cloud. A vast array of assets have been made via this suite of applications by Serif® alongside the CC, depending on the type of digital / print collateral that needs to be created and the requirements of the task at hand.

**Adobe® XD – 3 Years**

Personal go-to tool for rapid prototyping of various forms of UI. Managed several brands web-components, color palette, typographical systems and asset libraries in XD and uses this extensively to communicate with other developers / project stakeholders a visual approach, both in high & low-fidelity presentations. Created and collaborated on several design MVP's through this software.

**Microsoft® Visual Studio Code – 5 Years**

Primarily develops all web-facing code via VSCode and does so effectively by utilizing this software to its fullest extent whenever possible. Has developed several websites, from award-winning portfolios to large e-commerce sites through the use of this software with many integrations and with a personalized, streamlined ESLint that is synced across a team of developers.

**Microsoft® Office – 3 Years | Apple iWork Suite – 5 Years**

For ancillary material oftentimes accompanying projects, the Office Suite and Apple's iWork Suite are used. Be it to manage large spreadsheets of translations for multi-lingual websites, or for writing technical proposals or to present an idea or research for project stakeholders etc. While not impactful on the daily for a developer and designer, these tools are used when working around any project.

**Apple macOS, iPadOS, iOS | Microsoft® Windows**

Well-versed in both major platforms for desktop and mobile with at least a decade of usage from both platforms. Primarily utilize Apple's operating systems for work and while on the go, but still utilize Windows on the daily for passion projects and for software unavailable for the opposing platform.
